

REMARKS

By this amendment, Applicant has amended claim 1 to better define the invention. These changes clearly distinguish over Hedman et al., which does not appear to have the anterior "axle" as suggested by the Examiner. Claims 6-8 have been canceled.

The changes made to the specification herein should overcome the Examiner's rejection to Figures 11A and 11B.

Based upon the foregoing amendments and comments, Applicant believes this application is in condition for allowance. Questions regarding this application may be directed to the undersigned attorney by telephone, facsimile or electronic mail.

Dated: June 11, 2007

Respectfully submitted,
